

## 9/11 Synthetic Terror: Made in USA

Webster Tarpley's new work is being enthusiastically received for its working model of the 9/11 plot: a rogue network of moles, patsies, and professional killer cells, operating in privatized paramilitary settings, and covered by corrupt politicians and corporate media. The simplistic Big Lie – that "it's paranoid to think 'our own government' could do it" – is exploded. Only state actors have the resources for spectacular terrorism.

Tarpley had already shown in 1978 that the Red Brigades were patsies of NATO and the fascist P2 lodge, so his 9/11 narrative cuts quickly to the chase. The absurdities of the official myth are highlighted; spurious leads to Pakistan or Saudi Arabia and muddled "blowback" theories of terrorism are dispelled.

"The strongest approach to truth... strongest of the 770+ books I have reviewed here at Amazon... without question, the most important modern reference on state-sponsored terrorism." – Robert Steele, ex-CIA and Marine Intelligence officer, #1 non-fiction reviewer on Amazon.com.
